More information
High performance with a wide range of solutions and options.

Product description

Bizerba labels for direct food contact safely and reliably fulfil their function: Our ISEGA-tested solution can be safely applied to your fresh, moist or even greasy food.

Bizerba offers you various solutions: For multicolored preprints, paper or film labels with a permanent, special acrylate-based adhesive can be used. Another alternative with particularly resistant properties is our polyethylene film-based synthetic paper label. It combines the print quality of coated paper with the robustness of a high performance film:

The label is tearproof and resistant against water, grease and chemicals. All Bizerba top materials additionally ensure perfect print quality in thermal transfer technology.

Label for direct contact with food

Highlights
