GLM-Emaxx ... a class of its own Exact weighing, accurate labeling - and saving a great deal of time.
The GLM-Emaxx is a fully automatic labeling device of space-saving design which has mainly proved successful as entry level class.

Product description
Impresses in many industries: For variable weight price labeling and product labeling in retail, trade and small industrial plants GLM-Emaxx offers most up-to-date features. Performance taking up minimal space. This compact, fully automatic machine with a small footprint can be used as a self-contained device with manual feed or can be integrated in existing production lines for fully automatic weigh price labeling. Another highlight is the high quality, easy-to-clean frame of the GLM-Emaxx. Furthermore there are many accessories. The standard scope of delivery includes three belts, available as divided or closed version which can be replaced w/o tools. By adjusting and maintaining the printer unit without tools costs can be reduced and printing quality can be increased. The new PC-based hardware provides more memory space and fast label data processing. Additional data for the LMIV is printed w/o performance loss.

Highlights
– Output up to 70 packages/minute
– Control of one or two labelers
– Thermal direct and thermal transfer print
– Printing of UNICODE fonts
– 2GB memory on board for article and layout data
– Program updates, line backups, backup and service printouts are possible with the external USB port.
– The internal USB port can be used for logging of process data, e.g. for statistical evaluations.
– Printing and processing of any one-dimensional and two-dimensional standard barcodes, among other things data matrix and QR code
– Easy change of label roll
– Servicing of printer unit without tools (e.g. when replacing the thermal bar, pressure roller).
– Scanner connection
– Remote service

Options
– Thermal transfer unit
– Printing mechanism 104 mm
– Applicators: Air-jet, piston, belt
– Rejection systems
– 12” color touch display
