Tire Labels

BIZERBA

A clean solution that allows you to label your tires in an efficient and safe manner: The adhesive-free edge of the Bizerba tire labels minimizes the cleaning effort of your application devices. It ensures optimal adhesion even on the most difficult surfaces. Matching your needs the specifically developed quality label is printable by means of thermal transfer ribbon or ink-jet.

More information
High performance with a wide range of solutions and options.

Product description

Bizerba tire labels are the right solution - meeting the special requirements of your product in terms of labeling: We have developed a soft special adhesive with strong adhesion which safely sticks to very grooved rubber surfaces. In all weathers. At the same time we emphasized practical and time-saving handling during printing: Other than with common labels which are entirely coated with adhesive, Bizerba tire labels have an adhesive-free edge all round. Advantages: The adhesive does not bleed. The label top side and your application device stay clean. Irrespective of whether you use a thermal transfer or inkjet printer. Our high quality PP top material makes it possible.

Tire labels

Highlights

- Strongly sticking special adhesive, ideally suitable for critical surfaces
- High quality polypropylene film for excellent printing results and optimal readability
- Non-adhesive edge for clean processing
- Optional adhesion-free strip for easier removal
- Individual design:
 - Pre-printable in multiple colors
 - Variable die-cutting formats
- Coating for thermal transfer printing or inkjet

Tire labels

Tire labels

Options

- Professional advice for a tailor-made material combination
- Final check and, if necessary, layout adjustment by in-house media designers
- Flexible print run from several thousand up to several million pieces
- Short delivery times
- Customer-oriented inventory management
