BRAIN2 Formulation

BIZERBA

BRAIN2 Formulation is the ideal software for manual formulation, dosing and batching. Thanks to the flexible, configurable operator prompting a high level of process reliability is reached.

More information
High performance
with a wide range of
solutions and options.

Product description

The Bizerba formulation software BRAIN2 Formulation allows to control production processes from a single formulation workstation up to a Client server solution. Master data can be centrally managed via master data maintenance. This includes material information, basic formulas, operating guidelines as well as notes and orders for formulation and manual dosing. Data can also be adopted by higher ranking ERP systems via a file interface.

All changes to master data are logged and can be called up via the audit trail functions. Batch tracking is ensured by input on the terminal.

General information | Positions | History

Basic weight: 80,000000 Kilograms [kg] Basic weight ratio: 0 %

Pos	Type	Article / Instruction	Default device	Default scale	Target value	Status
1		012199 (Bockshornklee (Trigonella foenum-graecum))	freem02:ST with LR	1 - Lastenaufnehmer1	0,000000 kg	
2		012214 (Curryblatter (Murraya koenigii))	freem02:ST with LR	1 - Lastenaufnehmer1	0,000000 kg	

Article by no: 012214 Article by name: Curryblatter (Murraya koenigii)

Target value: 0,000000 Kilograms [kg] Target equivalent [%]*: 0,000

TU: 0,000000 Kilograms [kg] TU: 55,000000 Kilograms [kg]

Must weigh Subtract weighing

* The equivalent target value is only an assistant field and is therefore not saved. Only the target value itself is significant.

3		k539 (Thymian, gerebelt)	freem02:ST with LR	1 - Lastenaufnehmer1	0,000000 kg	
---	--	---------------------------	--------------------	----------------------	-------------	--

Highlights

- Central master data maintenance and formula management
- MES / ERP connection via adoption of orders or formulas (CSV file)
- Process reliability due to targeted operator prompting
- Change history of master data via audit trail included
- Displaying of mandatory signs, hazard symbols and product images
- Customer provided data connection via programming of web service interface possible
- For each workstation settings can be customized.
- Cyclic backup function possible

Product benefit

- Avoidance of operating errors due to targeted operator prompting and verification of material number per order item
- Process reliability during formulation
- Clearly defined work steps
- Verification of order number and article
- Displaying of mandatory signs and hazard symbols

Functions

- Manual dosing aid
 - Easy, intuitive operation via touch application
