

Data Sheet

LabelSecure

BIZERBA

Labeling inspection by vision.

LabelSecure is impressive in terms of its unique inspection performance for various packages.

Depending on your production line, LabelSecure is available as integrated or stand-alone solution.

More information

High performance with a wide range of solutions and options.

Product description

LabelSecure inspects labels and information on top and/or bottom of packages.

In the event of an error or an issue in production, an alarm alerts the operators so that the problem can be corrected immediately. LabelSecure prevents rework operations on defective packaging, complaints, and/or product recalls due to mislabeling.

In addition to package integrity guarantee, LabelSecure automatically contributes to the total traceability of the product by archiving all images captured during production and by monitoring the packaging line with a regular output of production reports.

LabelSecure is compatible with a wide range of packages and addresses a number of inspection needs.

example

Highlights

- Contact-free inspection onto whole production
- Prevents labeling error
- Automatic sorting of products which do not correspond to reference criteria
- Modularity to integrate a wide variety of sensors according to control requirements
- Well suited for multi-format lines with automatic changes
- Hygienic design of the solution
- Compatible with a wide range of containers
- Software for complete tracking of all products: saving of images incl. date and time, counter, production and machine log
- Safe and easy operation:
 - Intuitive user interface with color touch screen
 - Offline parameter-setting allows manual adjustment of parameters based on saved images
- Easy installation on existing lines (max. 2 meters including rejection)

example

example

Options

- Robot guidance communication
- Dual lane version
- IP66
- With rejection or dual rejection module
- Mechanical or air-blower pusher
- Lockable rejection bins
- Air conditioning
