System Class
Systematic versatility

www.bizerba.com
Our experience sets standards

We are a family-owned company guided by a commitment to tradition, sustainability and responsibility. Nowadays, based on our core competence of slicing and weighing technology, we offer our customers the industry’s largest and most unique range of products and solutions as hardware, software and services, anywhere in the world.

As a globally operating technology company we are guided by our goal and commitment to achieve maximum results in terms of ergonomic design, hygiene, safety and efficiency. We believe we have a role to play in shaping our markets, and are continually setting new industry standards. In close collaboration with our customers and against a backdrop of technological advancement, we are working to improve our products on a daily basis – resulting in innovations which become new standards.

In order to continue to live up to these requirements, we focus on the highest possible quality standards and internationally recognized technology standards in our development and manufacturing work. This is how we best support our customers in achieving maximum efficiency and profitable growth.

Our experience sets standards. That’s what sets us apart. Bizerba.
Our System Class brings together all the necessary features for efficient performance. Its model versions permit many solutions which are characterized by their attributes: Technically sophisticated, suitable for a broad weight range and easy to operate.
System Class
SC II 800 7"

The SC II 800 7" is a counter scale for assisted sales with a modern and functional design which is ideal for any store environment. It’s like an extra sales assistant providing convincing arguments, e.g. as a result of the ergonomic operating concept with direct visual contact with the customer. Or through advertising and information via the 7" customer display creating appealing buying incentives. Moreover, the scale can be used as a cash register, for inventory, data maintenance and pre-packaging.

It is based on a sophisticated technology with a fast processor, large memory, energy-saving components as well as different interfaces. The integrated printer fulfills many requirements even in the standard version of the scale. In addition, there is a broad range of different keyboards.

* Optional for all SC II models
** Optional for SC II 100, 400 and 800
Functions that add value

Printer
Powerful equipment right from the outset: The integrated label printer is equipped for label printing or receipt operation. It is part of the standard version of all SC II scales. Important facts: The use of Bizerba consumables increases operational uptime.

The optionally available linerless printer can be fitted with Bizerba linerless thermal rolls without liner. Its advantages: e.g. higher label volumes as a result of longer running lengths, less paper consumption and reduced waste. Sealing instead of stapling: Safe and hygienic sealing of bags by simply attaching a label – no risk arising from staples.

Customer display
Advertising attracts customer interest: Optionally fitted with a 7” LCD color display on the customer side, some of the SC II models stand out regarding their appealing full screen and permanent advertising. Moreover, based on the PLU, product information, pictures or additional product recommendations can be presented. The contents can be easily uploaded via USB stick, via Ethernet through manual distribution or via our RetailImpact software.

On these scales, advertising lists with any number of pictures can be set up for an entire year. When the device is not in use the entire display serves as an advertising medium, but during operation the size of the advertising space is reduced to display permanent advertising only.

Inner values
An "intelligent system" controls all SC II scales: It consists of a Microsoft operating system, a fast processor and Ethernet connection via which the scales communicate with the back office and with each other – even wirelessly if required. Even in the standard version, all relevant hardware interfaces are integrated, such as for cash registers, scanners and E-Cash terminals.

In addition to energy saving components, the scales optionally have an integrated battery. This is a major advantage since they can work without an external power supply which is particularly important for use in the mobile retail sector. A 12 V connection for operation via a car battery is also available as an option.

Data management
Fast flow of data for all activities: The remote service speeds up the communication between back office and the SC II scales. All settings can be checked and modified via remote control. Furthermore, data is managed simultaneously on all scales.

In addition, new scale program updates are transferred to the entire scale system. In parallel with this, all the data is saved automatically and then uploaded into the scale data memory again through a remote update. The dynamic hardware allows a fast response during operation and forms the basis for expansions.

Flexible operating procedures
Many possibilities for operation: Depending on the requirements, the freely configurable tactile or membrane keyboards of the SC II scales can be adjusted to specific operating and operation procedures. PLUs or functions can be assigned to the keys easily.

In order to efficiently support employees the keyboard can be labeled with colored key pictograms using a frame. A complete operating sequence can be started simply at the touch of a button. This saves time and simplifies operation. Moreover, time-controlled reports can be generated without human intervention: upon request, periodically, daily, weekly and monthly reports are printed out on schedule and automatically.
Diversity at the touch of a button

The keyboards of the SC II scales are easily adjustable to your individual requirements. The key functions are freely configurable and the keyboard layout can be customized.

Keyboards SC II 100, 200, 400, 800
There are manifold options since the keyboards are variable through lettering or pictures and different numbers of keys. The keyboards can be labeled individually.

Membrane or tactile keyboards
The SC II scales are fitted with membrane or tactile keyboards – or both. As a result of their colored keys, the membrane keyboards are easy to use. Thanks to their excellent look and feel the tactile keyboards ensure safe and convenient operation.

Keyboards SC II 500
An equally impressive choice of keys is also available for these self-service keyboards. Text, PLU and graphics can be represented with 24, 48, 72, 96, 120, 192 or 216 tactile keys or with 24 to 216 keys in a mixed arrangement with different key sizes – resulting in the following advantages:
- Clearly arranged, ease of use and operating safety.
- Touch function allows for easy operation.
- Enhanced security with tactile feedback.

Highlights
- LCD dot matrix display for weight, basic price, sales price and tare display
- Membrane keyboard: Freely programmable
- Label printer:
  - Graphic-capable, printing of logos
  - Label sizes and layouts freely configurable, possibility to switch to receipt printing
  - Label layout on receipt paper
- Operating mode:
  - Assisted, self-service and quick service sales
  - Cash register functions with amount tendered/change operation
  - Weight and fixed price labeling
- Reports/analyses:
  - Extensive, freely configurable reporting system for PLU, product groups, VAT, operators, department, main department, training
  - Sales transaction frequencies for department, product group and operators
  - Various sorting criteria
  - Price change journal, electronic receipt journal

Options
- Licenses for software modules:
  - Cash register, scanning, e-cash, inventory, re-weighing, returns, delivery note, return delivery, cash invoice, purchase order, proof of origin, operator time recording, video journal, sum QR-barcode
- Customer display:
  - 7” TFT LCD color display
  - Article images
  - Cross selling images
  - Full screen advertising
  - Permanent advertising
- Keyboard:
  - Tactile keyboard, 84 keys for PLU and/or further functions
  - A slip-on frame with 24 self-service keys can be mounted to the tactile keyboard
- Linerless printer
- WLAN
- Battery operation:
  - Internal lithium-ion battery pack (not in connection with WLAN), rechargeable via the scale’s power supply unit
  - External battery operation:
    - 12 V with a special battery connection cable (not in connection with WLAN)

For top quality and reliable performance

In your day-to-day work with the SC II scales, you can rely on high-quality cleaning products and original consumables in Bizerba quality. Everything is perfectly matched to your products ensuring the best possible results and longevity of your investment. A perfect example of teamwork with added benefits for you.

Cleaning agents
Optimal functioning and constant availability of your devices and machines requires professional care. Our high quality cleaning agents play an important role here since they are specifically developed for demanding conditions in retail, industry and food service. They are easy to use and show impressive results: perfect cleanliness providing protection as well as disinfecting hygiene for sensitive components and smooth surfaces. For each material whether stainless steel, plastic or glass, we have a suitable cleaning agent in our comprehensive assortment. Clean solutions for your work area or production facility.

Quality labels
Many functions using minimal space: Labels are an indicator for price and ingredients and communicate with industry, trade and end customers via barcodes, QR codes, RF and RFID tags. As a key component of the packaging they fulfill important marketing functions with regard to corporate design, brand names and product marketing. Furthermore, as a production factor, they have an impact on costs and feasibility in the manufacturing process. Our quality labels offer almost unlimited possibilities: ranging from the ecological, high-quality linerless version and thermal-sensitive labels which are conform with the Food Information Regulation up to multi-functional labels for product and brand protection. Also here we produce in an economical and innovative manner. Learn more about our labels.
