High performance with
a wide range of
solutions and options.

IngredientManager – AllergenManager

In accordance with legal requirements: With the RetailApp IngredientManager you quickly and efficiently mark allergenic ingredients in your ingredients lists and thereby making allergens transparent.

The RetailApp IngredientManager consists of two license modules which may be used together or individually: AllergenManager and IngredientFinder. With the AllergenManager, the legal requirement of labeling allergenic ingredients is fulfilled. All allergenic ingredients are recorded once as keywords. Thereafter the RetailApp automatically takes care of the labeling based on defined formatting requirements. Whether new articles are added or changes are made to the ingredients lists, the AllergenManager ensures correct allergen labeling. Advising customers even better during the sales process - with AllergenManager, article related allergens can be shown on the customer display. And this information can be printed together with the article. Making allergens transparent with AllergenManager.

Functionalities

- Labeling of allergenic ingredients in ingredient lists of articles via defined keywords
- Configurable formatting of allergenic ingredients
- Showing of allergens on the customer display
- Printing of allergen information while sales process possible

Benefits

- Meeting legal requirements on allergen labeling
- Comprehensive customer information already during article call-up on the scale
- Only one-time maintenance of keywords. Changes are automatically identified by the RetailApp.
