

Data Sheet

B100

BIZERBA

The ideal solution to hygienically slice a large variety of bread – also in self-service. Even warm loaves of bread can be cleanly sliced by the B100. Hard crusts or bread loaves containing nuts can be precisely and safely sliced to the customer's preferred thickness. This low noise, easy to operate and clean bread slicer can be flexibly installed.

More information
High performance with a wide range of solutions and options.

Product description

The Bizerba bread slicer is impressive in terms of its sophisticated concept: To achieve particularly hygienic results the machine slices oil-free. Possible mildew growth or the transfer of germs on the cut surface of fresh bread are prevented. Products stay fresh for longer and the machine can be cleaned faster and easier since it works oil-free.

The slicing performance of the B100 is extremely versatile: Slice even warm or soft long or round loaves of bread with precision. Even whole nuts in the dough are cut without effort.

This versatile bread slicer is ideally suitable for self-service. Its sophisticated safety concept and an easy self-service program make it possible. This low-noise machine is of compact design and can be flexibly used.

B100

Highlights

- High hygiene standard: All parts getting in contact with the product consist of food-grade materials
- Efficient cleaning: Bread crumbs resulting from slicing are collected in a crumb compartment and can be quickly and easily disposed off
- Safe handling: The product holder prevents bread from slipping and ensures optimal slicing results
- Flexible use: Halving, quartering and individual slices of various types of bread
- Appealing design: very good integration in the store design
- Variable slice thickness: adjustable between 3-30 mm

Slice thickness adjustment

Crumb compartment

Options

- Individual equipment:
 - Sliced product holder: with 7 or 13 teeth or round gripper
 - Sliced product support: standard/125 mm or long/280 mm
 - Blade: specially serrated Teflon bread blade or serrated Teflon blade with specially ground edges
- Bagging unit
- Stand
