High performance
with a wide range of
solutions and options.

Product description

The B3 Automatic Weigh-Wrap System is tailored for retail, enhancing packaging quality and efficiency for various fresh foods. Its compact, automatic design includes an integrated labeler and precision scale, allowing flexible packaging and label positioning. With RetailPowerScale software, it integrates smoothly into existing systems, reducing training needs. The hygienic design simplifies cleaning, boosting efficiency. It stands out with its Windows OS for added security and ease, wrapping a broad range of product sizes, and supports recyclable film, setting a new industry standard.

The B3 Automatic Weigh-Wrap System is built for longevity and backed by comprehensive service support, ensuring it meets and exceeds retail industry standards for efficiency and reliability.

Highlights

- Performance & Efficiency: minimal downtime due to large label roll capacity.
- Operational Ease: User-friendly automatic operation, compact design for easy installation, and service-friendly maintenance.
- Packaging Quality & Flexibility: Flexible packaging options for various sizes, superior packaging quality with minimal wrinkles, and excellent sealing.
- Advanced Features: Advanced labeling with a 3D applicator, promotional labeling capability, and a hygienic design optimized for easy cleaning.
- Innovative Technology: Precision weighing without the need for compressed air, enhancing sustainability and reliability.
- Reliable results: High-performance multi-interval weighing system
- Dedicated Service Support: Comprehensive service and maintenance plans to ensure long-term reliability and performance

Options

- Adjustable Product Exit: Option for left or right side exits for operational flexibility.
- Customizable Weighing Ranges: Various weighing ranges to accommodate different product sizes and types.
- Wireless or wired Connectivity: WLAN feature for seamless network integration and remote operation.
- Operation Modes: Different modes tailored for specific packaging needs, enhancing versatility.
- Enhanced Security: Advanced security options for data protection and compliance.
- Modular Components: Easy upgradeability and maintenance with modular design features.
- Remote VPN connection into the unit by Bizerba technical support to aid in training or troubleshooting

My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
